Musculoskeletal Ultrasound and MRI Correlation

Lead by Dr John Read and Stephen Bird, this two day intensive seminar is suitable for radiologists and senior sonographers featuring musculoskeletal ultrasound, MR correlation and Intervention and reporting protocols.

This MSK Seminar will feature:
- Live Scanning demonstration and discussion with anatomy correlation in real time with interactive multiplanar isotropic MRI datasets.
- Illustrative case studies with actual reports and a discussion of reporting principles.
- High quality large screen dual presentation

The Marquis Event has a strong focus on clinically relevant live ultrasound scanning and MR correlation by presenters with a national and international reputation for excellence and innovation.

Very high standard of teaching. Unique combination of interactive lecturer, live scanning & illustration and a large range of pathology with correlation with other imaging modalities.

Dr Choung, B., Staff Specialist
