46th IDKD 2014 on Diseases of the Abdomen and Pelvis
Preliminary Program
Scientific Program

Pediatric Radiology
Satellite Course “Kangaro”

KANGAROO

Pediatric Radiology Satellite Course Advisor
Thierry A. G. M. Huisman, Baltimore, MD, US

Duration
Saturday, March 29, 2014: 09.45 – 17.00

Target Audience
- Pediatric Radiology residents and fellows
- Pediatric radiologists
- Radiologists with interest in and / or obligation for pediatric radiology
- Interested clinicians
- Radiology technicians with advanced competences / interests

Course Objectives
1. Teach the participants effective approaches in analysing diagnostic imaging challenges in pediatric patients with diseases of the abdomen and pelvis
2. Allow participants in guided self study to recognise key imaging features of various diseases
3. Teach participants in which setting which imaging examination is most effective
4. Offer participants to interact with top international experts in the fields of pediatric abdomen and pelvis imaging

Course Principles
Workshops with short introduction to the topic followed by case-based interactive discussion with the audience. Each participant attends all workshops.

Workshops

1. Hepato-Biliary and Pancreatic Diseases in Children
   Jeanne Chow, US
2. The Acute Abdomen in Children
   Alan Daneman, CA
3. Tumor and Tumor Like Lesions of the Pediatric Retroperitoneum
   Simon G. F. Robben, NL
4. MR, MRU, Perfusion and Diffusion Weighted MRI of Urogenital Pediatric Diseases
   Pierre H. Vivier, FR
