LEARNING OBJECTIVES
This teaching course aims to provide practical information for radiologists who are willing to start or promote prostate MRI at their own institution. It will include formal state-of-the-art lectures presented by experts in the field. The course is structured in two parts, focusing primarily on the advanced technical issues and related clinical indications. During the Hands-on session the groups of participants will rotate between different consoles.

MAIN TOPICS
• Fundamentals for practice of prostate MRI
• How we do it: technique and image protocols
• WHY and WHEN we do it

WORKSHOPS
- Cases and discussion
- Hands-on
